

Jean
and
Norman
ART

10 | October 2011 | www.JeanAndNormanArt.com

Dear Jean,

This is our first newsletter from our new website. We plan to include several useful hints covering a number of areas of interest.

If it is related to Art, we can provide a service for you. Among the services we provide are:

- **Repair old and damaged photos** and provide a new digital copy of the photo and a new printed version.
- **Transfer old VHS tapes to DVD** and add menus to enable selection of scenes.
- **Scan and repair photos from 35mm slides** (and up to 8" x 10" negatives).
- Create **stained glass or watercolor** paintings from your photos of family or pets.
- Bronze figures (We have 2 for sales)
- **Original Art** - watercolor. We add new paintings frequently.

We currently save any photos or documents that we scan to a Kodak Archival DVD. These DVD's last up to 100 years.

Kodak Scanners, Parts and Supplies

We now have put up on the website, (under our [catalog](#) link) Network Scanners, Department Scanners, Photo Scanners and Workgroup Scanners. Under each scanner series, related parts and supplies are displayed for your convenience. The same great service you used to get from Tri-State Info Tech is now available here. (I had two companies, but decided one was enough and combined them together.)

E-Books

Converting printed books to either the Amazon.com format or any of the other formats, is a unique service that we can provide to budding or established authors.

Amazon.com's format is currently only supporting black and white artwork or photos, but we still provide them with colored versions so that when upgrades are available; your e-book is up to date. iPad, Nook, and various phones, etc. now usually use color. There is a difference in the final draft of these books, but we can provide the completed versions for each.

Amazon.com used to require that the book be in print form before allowing the e-book version, but that is no longer the case.

Old 35mm slides, photos and VHS tend to fade over time. By using our services, we can restore and put them on archival DVDs for you.

If you want us to contact you about any services that we offer that you would like more information about, please go to our [contact us](#) page, or call us (620) 331-6300 or toll free at (877) 331-3144.

Authors can go directly to the e-book versions. A great boon for everyone now. Be sure to read the following book:

E-book "Hang in there cowboy, God is riding with you!" by Darryl Deering.

This is an entertaining story about Darryl Deering as he was growing up until he was a young man. He got himself in serious problems while riding untrained horses and bulls; and just having fun. He often thanked God for saving him from serious injury during his adventures that most would avoid.

It is a heartwarming story and full of laughs and wonders how he survived it all. It is rated for children and adults as both will enjoy it and want him to write more.
